

Work sheet
Geography -2

Land, soil, water, Natural and wild life Resources. (Module-3)

1) What is biosphere?

A) A narrow zone of contact between the lithosphere, hydrosphere and atmosphere is called biosphere.

2) What are the uses of natural vegetation?

A) Plants provide us with timber, give shelter to animals, produce oxygen, control soil erosion and give us fruits, nuts, latex, paper and medicinal plants.

3) What are the uses of wildlife?

A) They provide us milk, meat, hides and wool. Insects provide honey, help in pollination of flowers and have an important role to play as decomposers in the ecosystem.

Try yourself

1) Name any two steps that government has taken to conserve plants and animals.
