

Work Power &Energy (WORKSHEET 2)

1. What is the relationship of work energy and power?
2. What happens to the energy as work is done?
3. What is the difference between work energy and power?
4. Is energy transferred the same as work done?
5. How does work affect an object's energy?
6. How is work energy and power related to each other?
7. What is the formula of work energy and power?
8. How do you calculate energy from power? Can force be converted into energy
9. What is conservative and non conservative force, give one example of each ?
