SECTION A (READING)

1. Read the passages given below and answer the questions given below: (10 marks)

1. One day God had to go away on work. He took everyone with him, except Saint Peter. God said to Peter, "Don't let anyone into Heaven while I am away." So, Peter stood by the door and kept watch.

2. After a while someone knocked, and Peter asked, "Who are you? What do you want?" "I am a poor, honest tailor," replied a voice. "Please let me in."

"Honest indeed!" said Peter, who at once recognised the man. "You have been stealing pieces of cloth from people's clothes. You will not get into Heaven."

3. "Come, do forgive me," said the tailor. "If little pieces of cloth fall down from the table and I take it, that is not stealing. Look, I am lame. I cannot walk back again. Just let me in, and I'll do all the work you ask me to do."

4. Saint Peter was moved to pity, and opened the door of Heaven just wide enough for the traitor to come in. He then told the man to sit in a corner behind the door, and wait until God returned to Heaven.

5. The tailor obeyed. But when Saint Peter went out to do some work, he got up. He started looking into every corner of Heaven. At last, he came to a room in which he saw a line of beautiful chairs. In the middle of the line was a chair more beautiful than all the others. It was made of gold and set with shining jewels. It was also higher than all the other chairs, and there was a footstool of gold in front of it. This was the chair from which God could see all that was happening on earth.

6. The tailor stood looking at the chair for a long time. At last, he could no longer hold himself back, and climbed and sat on it. Then he saw all that was happening on earth. He saw an old, ugly woman washing clothes by the side of a river. As he was watching, she secretly took two pieces from the heap of clothes in front of her and hid them away for herself.

7. When the tailor saw this, he became so angry that he took the golden footstool and threw it at the old woman. It went through Heaven, and fell on earth. But now the tailor became worried, because he knew he could not bring the footstool back. So, he went and sat in the corner behind the door, and behaved as if he had never left the place.

8. When the Lord returned to Heaven, he went and sat in His chair. But then he missed the footstool. He asked Saint Peter what had become of it, but he did not know!

9. Then the Lord asked him. "Did you let anyone in during my absence?"

Saint Peter said, "No one, Lord, except a lame tailor. He is still sitting behind the door." So the tailor was called. He was asked if he had taken away the stool.

10. "Oh Lord," answered the tailor proudly, "I threw it down in anger at an old woman on earth, whom I saw stealing clothes at the washing."

11. "Oh, you fool," said the Lord, "if I had judged as you have judged, how would you have escaped so long? I should have had no stools, chairs or benches in Heaven, because I should have thrown all of them at you, and other sinners like you on earth. No one shall give punishment here, but I alone, the Lord."

12. Saint Peter then took the tailor from Heaven to a place where sinners suffer for their sins. There they wait in the hope that they may finally come to Heaven.

2. Benjamin Franklin was a famous American who lived about two hundred years ago. When he was a boy, of course, he loved toys and playthings. But when he became a man, he was still interested in toys. He was always working at some hobby or finding out something interesting.

3. One day when Franklin was forty years old, a friend of his, who had been travelling in Europe, showed him a strange new toy. It was a top, a round toy that spins around on a table or the floor. This top was made of glass. It was like fireworks. At that time, no one had ever seen anything like it.

4. "Magic!" cried Franklin. "Let me try it." He laughed with pleasure when he rubbed the glass top and saw sparks of light. "I'll have fun with this," he said. "People will think I am a magician."

5. He got a glass-maker to make him a top just like the one his friend had showed him. He played with this toy a great deal. But he also began to think about it. He wondered why light and fire came out of the glass. Thus, he began to study electricity. He learnt all he could about it.

6. At that time, people did not know that lightning, the bright flashes of light that appear in the sky during rain, was really electricity. But Franklin began to think it was the same thing as the sparks he got by rubbing the glass. He wrote to many learned men about this. But they laughed at him.

7. So Franklin decided to try out his idea secretly, without letting anyone know about it. He made a kite out of paper, sticks and string.

8. He and his son took the kite and went to a quiet place outside the city. It was a rainy day. The sky was full of heavy black clouds. There was a great deal of thunder and bright lightning.

9. They tied a long hemp rope to the kite, and at the end of the rope, Franklin tied a key. He did not hold the key in his hand but held a little silk string which was tied to it.

10. The kite flew high among the clouds. When lightning flashed, they saw that light seemed to run along the hemp rope. The rope looked like the tail of an angry cat.

Franklin knew electricity was dangerous. But he wanted to make sure that the light he saw was electricity. So, he put out his hand and touched the key with his fingers.

11. Immediately, he felt the shock of electricity. He knew that he had pulled electricity from the clouds.

After this, everyone believed him. He had proved that his idea was true. He became very famous. People who had laughed at him admired him now. He had been brave enough to try out his idea and prove that it was right.

Ishwar Chandra, therefore, submitted his letter of resignation stating therein that he considered it disgrace to continue in service in the distress of his mother's feelings. The college authorities were taken aback and had to climb down. Leave was granted. He set out at noon and walked till evening to reach the bank of Damodar. It was impossible to cross the

swollen Damodar at night. When he went to the riverside the following morning, he saw that the river had resumed a terrible aspect and the ferry had ceased to ply. He offered the boatmen a large reward, but they dared not make the attempt. So he jumped into the river and proceeded to swim across. 2. Read the following passage carefully and answer the questions that follow. (10 M)

1.Why does a person become overconfident? The reason lies in over assessment of his capabilities. Sometimes people over assess their competence and jump into situations that are beyond their control. Napoleon Bonaparte who became Emperor of France would say that the word “impossible” was common only amongst fools. The overconfident Napoleon invaded Russia in the winter of 1812. This proved to be a big disaster.

2. Overconfidence generally leads people into misadventures, endangering their chances in life. It is wisely said that any achievement is a result of two factors—one’s personal planning and support from the external world. People take into account only their planning, generally ignoring the external factors. They become unable to foresee future developments. Hence, the great risk of failure. Then there is the question: how can one manage overconfidence? The formula is very simple. Before taking a decision discuss the matter with other informed people with an objective mind and when it is proved that you are about to go off the path, accept reality and say without delay, “I was wrong”.

3 . Overconfidence is a flaw characterizing people who lack the virtue of modesty. Modesty makes you a realist; you become a person who is cut down to size. People of this kind

become very cautious; before taking an action they assess the whole situation. They adopt a realistic approach. Overconfident people live within their own thoughts. They know themselves but they are unaware of others. Living inside their own cell they are unable to make use of the experience of others. This kind of habit is highly damaging to all concerned.

4 . There is a saying that young man sees the rule and the old man sees the exception. With a slight change , I would like to say that the overconfident person sees the rule and the confident person sees the exception. Overconfident people are always at risk. It is said that taking risk is good but it must be well calculated otherwise it becomes very dangerous.

- d. Neither (a) nor (b)

3. People are at a great risk of failure, when they ignore:

- a. Personal planning
- b. external factors

Section A- Reading Comprehension (20)

Q.1 Read the following passage:

(10)

1. Wolves, jackals and foxes all belong to one family, the family of dogs. They are found on all the continents except Antarctica. The legs of the animals in this family are long and well-shaped. The paws have strong blunt claws. All the animals run fast, some at a speed of 65 kilometres an hour!

2. The hair is thick and of various shades of grey or red. Some of the animals are striped. One of the African jackals is called the striped jackal. The African wild dog has black, white and yellow spots. This is the only wild animal that has hair of three colours.

3. The largest and strongest animal in the dog family is the wolf. It can run so fast with a goat or sheep on its shoulder that you can hardly catch up with it even on a good race horse. It is very true to say that the wolf lives by its feet. Sometimes it runs 60 kilometres a day in search of prey. And does not always find it, even after running that distance. It is not easy for an animal in the wild to find food. For this reason, when a wolf makes a good kill, it gorges itself. It can eat 10 kilograms of meat at one time. The wolf has very strong jaws. It can crush large bones easily. The jackal is the most cunning member of the dog family. People don't like it because it is a terrible thief. What cunning it shows! If a jackal wants to catch a crow or a magpie, it lies down by the road and makes it believe it is dead. When the bird sees the jackal, it comes down to peck at the 'dead' flesh. Up jumps the cunning jackal, and that is the end of the bird!

Case based questions (Q. No. 21 to 25)

All of us use water in our homes and make it dirty. Rich in lather, mixed with oil, black-brown water that goes down the drains from sinks, showers, toilets, laundries is dirty. It is called wastewater. This used water should not be wasted. We must clean it up by removing pollutants. Clean water that is fit for use is unfortunately not available to all. It has been reported that more than one billion people have no access to safe drinking water. This accounts for a large number of water related diseases and even deaths. People, even children walk for several kilometres to collect clean water.

The increasing scarcity of freshwater is due to population growth, pollution, industrial development, mismanagement and other factors. Realizing the urgency of the situation on the World Water Day, on 22 March 2005, the General Assembly of the United Nations proclaimed the period 2005-2015 as the International Decade for action on “Water for life”. All efforts made during this decade aim to reduce by half the number of people who do not have access to safe drinking water.

Answer the following questions.

Their chief, Kamal Khan Gakkhar, was made a noble (mansabdar) by Emperor Akbar. In Multan and Sind, the Langahs and Arghuns dominated extensive regions before they were subdued by the Mughals. The Balochis were another large and powerful tribe in the north-west. They were divided into many smaller clans under different chiefs. In the western Himalaya lived the shepherd tribe of Gaddis. The distant north-eastern part of the subcontinent too was entirely dominated by tribes – the Nagas, Ahoms and many others. In many areas of present-day Bihar and Jharkhand, Chero chiefdoms had emerged by the twelfth century. Raja Man Singh, Akbar's famous general, attacked and defeated the Cheros in 1591. A large amount of booty was taken from them, but they were not entirely subdued. Under Aurangzeb, Mughal forces captured many Chero fortresses and subjugated the tribe.
